

## PORTABLE CRUSH AND YARDS

### CRUSH AND RAMPS

Our crush incorporates a headbail, loading ramp and side opening gates in one unit. The headbail provides restraint and facilitates ear tagging, dehorning and health treatments. Side opening gates allow for vet access. The floor lifts to become a loading ramp and there is a sliding gate at the back of the race. For transporting the crush, the entire unit can be raised or lowered and the yards stack inside the ramp. All gates have spring loaded latches and all steel is Duragalv coated to prevent rusting.

### YARDS

These portable yards can form a pen any size to hold stock. The entry gate can be placed anywhere in the pen. The yards connect to the race so the pen feeds the race when using the ramp or crush. Plans can be made to suit your needs. All yard panels are made from galvanised steel to prevent rusting. Panel size is 2.3m long and 1.65m high with seven horizontal rails in each panel.

### STANDARD PRICING

Crush and ramp: \$7,250.00

Entry gate: \$450.00 each

Yard panels: \$375.00 each

Prices are GST and freight exclusive
